

```
package emConnexionBase;

import java.sql.*;

public class PremiereConnexion {

    public static void main(String[] args) {
        try {
            Class.forName("com.mysql.jdbc.Driver");
            System.out.println("Driver O.K.");

            Connection conn = DriverManager.getConnection("jdbc:mysql://localhost/location", "root", "");
            System.out.println("Connexion effective !");

            conn.close();

        } catch (Exception e) {
            System.out.println("Problème !");
            e.printStackTrace();
        }
    }
}
```
